PTR'S DAN SANTORUM GIVES TOP 10 REASONS WHY TENNIS PLAYERS SHOULD WEAR THE BIONIC® TENNIS GLOVE

HILTON HEAD, SC (February 16, 2009) - "Tennis players should wear a glove!"

So says Professional Tennis Registry CEO Dan Santorum, leader of the organization that represents over 13,000 of the world's top teaching pros and tennis coaches.

And Santorum says not any glove will do.

"Players should wear the Bionic Tennis Glove because it will improve their performance."

That's a mighty strong statement, but Santorum can back it up. Playing daily, he hasn't taken to the court without a Bionic tennis glove for nearly a year.

"I was skeptical when I first heard about the Bionic tennis glove," Santorum says. "When it comes to sports where people use their hands, tennis is among the last to embrace wearing a glove. But after a few volleys it felt very comfortable. After wearing the Bionic tennis glove for a set I was in love with it."

Designed by a leading orthopedic hand surgeon, Bionic gloves are from Hillerich & Bradsby Co., the 125-year old makers of Louisville Slugger® gloves, bats, and other sports equipment. Bionic's patented scientific and anatomical design and construction are unique. Santorum says the Bionic tennis glove is like a second skin.

"The fit is amazing. Bionic's scientific design provides players with a light grip that relaxes your forearms," he says. "Relaxed hands and forearms increase racquet head speed for more power, and in tennis we all want more power."

The Professional Tennis Registry CEO says Bionic's system of anatomical relief pads also allow players to switch their grips on the racquet easily. The pads and other features provide additional benefits to players. They reduce hand fatigue and prevent blisters and calluses. Terry cloth pads inside the gloves control hand perspiration to enhance racquet control.

Santorum, who has conducted coaching clinics and tennis workshops worldwide, has come up with a list of the Top 10 Reasons Tennis Players Should Wear the Bionic Tennis Glove.

More.....

**PTR CEO DAN SANTORUM'S
TOP 10 REASONS TENNIS PLAYERS SHOULD WEAR
BIONIC TENNIS GLOVES**

- 1. Increased racquet head speed as a result of a secure grip.**
- 2. Better grip on the racquet due to increased head surface.**
- 3. Superior grip on the racquet in hot and cold weather.**
- 4. A lighter grip on the racquet which avoids muscling the ball and makes for easier grip changes.**
- 5. Reduces calluses and blisters.**
- 6. Reduces hand fatigue.**
- 7. Do not have to spend money on new grips or overwraps.**
- 8. Sun protection on the most exposed part of your body (provides SPF 50, protects 95%)**
- 9. Form-fitting wrist closure supports the wrist to give added stability without sacrificing flexibility and motion.**
- 10. Takes very little time to get accustomed to and once you use it you will never play tennis again without the Bionic tennis glove.**

Santorum has produced a video touting the performance benefits of wearing Bionic tennis gloves and covering the ten reasons he thinks players should wear the glove. The video will be distributed electronically to the PTR's members worldwide. It will also be seen on the PTR's web site at www.ptrtennis.org and on the Bionic gloves site at www.bionicgloves.com.

"I really believe in Bionic glove technology," Santorum says. "It's proven to help golfers, baseball players, weightlifters and other athletes. "It can help the millions of people playing tennis worldwide too. I believe the Bionic tennis glove is going to change the game of tennis."

Bionic Gloves are the Official Glove of the Professional Tennis Registry.
